project #1 Maha Alsuwayyid April, 29, 2020	report

the tableau Dashboard I worked on is "**LinkedIn Top Skills**".

★ **First observation:**

Which is the skill that ranks high?

ScreenShot:

How I found this information to reach my conclusion?

From that dashboard, I clicked on The "Statistical Analysis & Data Mining' skill this displays that The Statistical Analysis & Data Mining skill takes high ranks in most Countries from 1s rank into 4th rank.
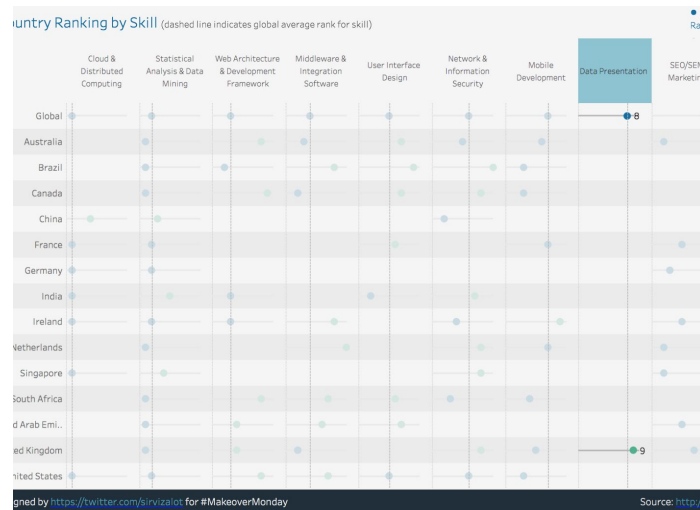

★ **Second observation:**

Which is the skill that ranks low?

ScreenShot:

How I found this information to reach my conclusion?

From that dashboard, I clicked on the "data presentation" skill, this showed this skill placed between 9th rank in the UK and 8th rank in Globally and Most of the countries do not care about the data presentation skill, So, it takes a low rank.

★ **Third observation:**

the variation of skill ranks for each country?

ScreenShot:

How I found this information to reach my conclusion?

From that dashboard, I clicked on The "user interface design" skill and I select "India" from Countries, this showed the user interface design skill has placed on the 2d rank. So, it takes a high rank in India, unlike other countries.
